All-weather floor mats

The all-weather floor mats are perfectly shaped to fit the respective floor dimensions of your Audi model.

The all-weather floor mats protect the vehicle interior from moisture and coarse dirt. They can be easily cleaned as needed. Due to the materials used, the all-weather floor mats can be recycled if disposed of properly. The material composition information can be found on the underside of the all-weather floor mat and on the fasteners.

Both the front and rear all-weather floor mats have non-slip nubs on the underside. The front all-weather floor mats must always be connected to the vehicle floor via the fastening points. Depending on the model variant, this may also be necessary for the rear all-weather floor mats.

The benefits at a glance:

- Perfectly fits the footwell of your Audi model
- The front all-weather floor mats have a coloured logo
- Protects the vehicle interior from dirt and moisture
- Non-slip underside
- The base material of the all-weather floor mats is plastic. This can be recycled.
- The standard of quality you expect from Audi: For your safety, the floor mats must successfully pass many tests, including for wear, smell, emissions, impact on climate change and many more.

When using the floor mats, the following must be observed:

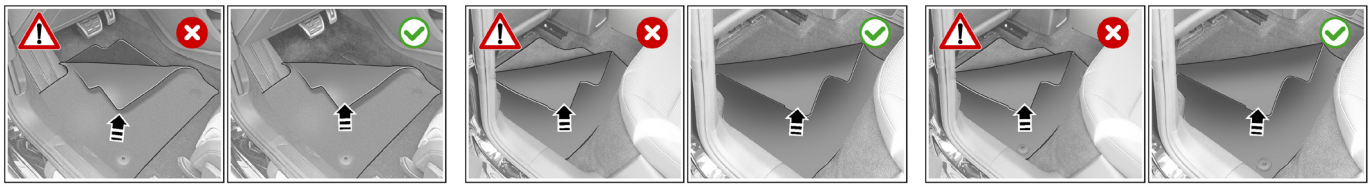

WARNING

- **Always remove the standard floor mats from the vehicle before attaching the all-weather floor mats.**

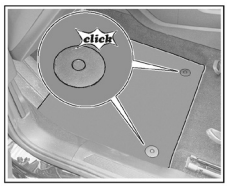

WARNING

- **Never place two floor mats on top of each other.**
- **The all-weather floor mats must never be positioned over the pedals.**

WARNING

- **The front all-weather floor mats must always be securely fixed to the vehicle floor using the fasteners.**
  Failure to do so may cause the floor mats to slip and obstruct the pedals. This could cause a dangerous hazard. When fitting the front floor mats, always make sure that they are placed under the pedals.
- **To clean the floor mats, they can be easily removed from the vehicle. The front floor mats must then be fixed to the vehicle floor again via the fastening points.**

- **Petrol and isopropyl/heptane will damage the all-weather floor mats. For this reason, contact between the all-weather floor mats and these substances must be avoided. Should these substances make contact with your mat, they must be removed immediately with suitable agents.**
